Partners in providing you with Eco-Luxury Transportation Service

BLADE →

At Exclusive Sedan, Eco-Luxury Transportation Service is not a pipe dream, it is a reality. We've equipped a portion of our fleet with Sabertec's Blade and we are...

**Improving our fuel efficiency ♦ Reducing our carbon footprint.
Improving LA's air quality.**

"The partnership with Sabertec is a strategic one that will help us maintain our position as the leading luxury transportation service company in the country. Cars are the core of our business, and we feel it is our responsibility to do all that we can to reduce their impact on the environment. Our eco-conscious clientele can feel good about their luxury rides with us thanks to Blade."

-Brandan Stein, Owner, Exclusive Sedan

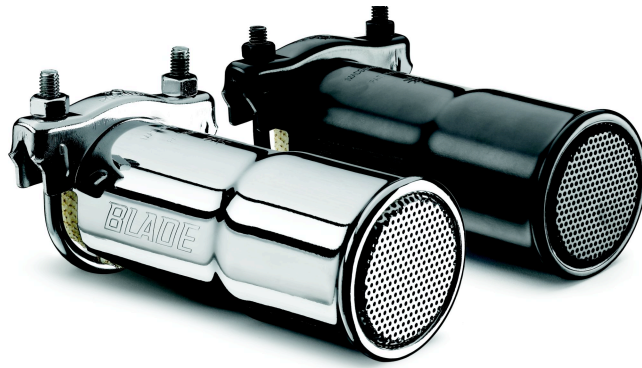

"Exclusive Sedan has set themselves apart by introducing Blade to their fleet and we're thrilled to be providing the solution that marries eco-consciousness and luxury transportation service. They are the only luxury car service in LA that is proving their commitment to the environment by using Blade. To be kicking off this partnership at a premier, green event like the Propr launch is incredibly exciting for all of us."

- Bill O'Brien, CEO, Sabertec.

Choose Eco-Luxury with Exclusive Sedan's Bladed town cars, limos and SUV's next time you need chauffeured transportation.

Blade's Gas Mileage & Cost Savings

Laboratory testing using the EPA 511 Protocol shows gas mileage increases of as much as 6 MPG. Consumer experiences on a wide variety of cars, light duty trucks and SUV's in the U.S., Europe and Latin America have resulted in gas mileage increase up to:

- ☞ 34% on 4 cylinder cars, e.g. Honda Civics, Toyota Corollas, Ford Focus, etc.
- ☞ 21% on light duty trucks and SUV's, e.g. Ford F250's, Chevy Avalanches, Range Rovers, etc.
- ☞ 16% on dual exhaust 8-cylinder sedans, e.g. Lincoln Town Cars, Crown Victorias, etc.
- ☞ 24% on 10 cylinder Box-style trucks, i.e. moving trucks.

Blade's Greenhouse Gas and Air Pollution Reduction – CO2

Laboratory test results show decreases of carbon dioxide (CO2) up to 12%. CO2 is a potent greenhouse gas and is the primary cause of man made global warming.

Blade's Air Pollution Reduction – Particulate Material (PM) Filtration

Particulate Material (soot) is an air pollutant known to cause grave environmental and human health consequences. Environmental consequences of PM include: air pollution, water pollution, deforestation, crop degradation, acid rain, acidification of waterways, and smog. Health consequences of PM include: cancer, cardiovascular and respiratory disease, fibrosis, asthma, reduced pulmonary function and increased mortality.
